|   | 15 Years/90,000 Hours;<br><i>Whichever Comes First</i> |

The Exhaust Pipe Extension Joint is used to extend the flue pipe easily and correctly. This accessory is required for indoor installations and outdoor installations if the exhaust gas needs to be led to a specific location.

Dimensional Drawings:  
Side View, Units: Inches

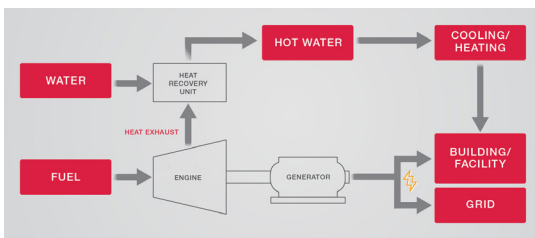

Notes:

Install the Exhaust Pipe Extension Kit following the instructions in the installation work manual.

Install Drain Filter DFB19E since the amount of exhaust drain water increases as the length of the exhaust pipe becomes longer.

Use only with the units specified for natural gas. The extension joint is not necessary for units specified for LPG since the exhaust outlet and exhaust pipe of the LPG units are the same shape.

**CHP Basic Flow**

NOTE: Due to YANMAR's ongoing commitment to quality, specifications, ratings and dimensions subject to change without notice. Improper installation, adjustment, alteration, service or maintenance can cause property damage or personal injury. Installation and service must be in accordance with current specifications, ratings and dimensions and be performed by a qualified installer and servicing agency.
